Examination of Application #09/

1. Claims 1-20 of application 09/965,878, filed on 28-September-2001, are presented for examination. This communication is in response to applicant's amendment received on 3-May-2005.

Claim Rejections under 35 U.S.C. § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

2.1 Method claim 1 is rejected for reciting a process that is not directed to the technological arts. In regard to claim 1, this claim is directed at a method for communication within a network. To be statutory, the utility of an invention must be within the technological arts. *In re Musgrave*, 167 USPQ 280, 289-90 (CCPA, 1970). The definition of "technology" is the "application of science and engineering to the development of machines and procedures in order to enhance or improve human conditions, or at least to improve human efficiency in some respect." (Computer Dictionary 384 (Microsoft Press, 2d ed.1994)). The limitations recited in claim 1 contain no language suggesting that claim 1 is intended to be within the technological arts. However, please note the method steps of claim 1 recited as part of a "computer-implemented method" would be considered as directed to the technological arts.

2.2 Product claim 18 is rejected because MPEP Section 2106(IV)(B)(2)(b)(ii) provides that a statutory computer process is determined not by how the computer performs the process, but by

In re Application of: Rodriguez

what the computer does to achieve a practical application. For example, a computer process that simply calculates a mathematical algorithm that models noise is nonstatutory, while a claimed process for digitally filtering noise employing the mathematical algorithm is statutory. The long line of cases in this area that are referred to in MPEP Section 2106(IV)(B)(2)(b)(ii) exemplify this requirement, by utilizing in the claim language, terms such as controlling, executing, changing and removing. In view of the aforementioned requirement, the Examiner respectfully contends that the claim language of independent claim 18 does not claim a practical application, that language claiming a computer program product for communicating within a network. The computer program product is determined to recite data embodied on a computer-readable medium. However, the data does not impart functionality to either the data as claimed or to the computer. As such, the claimed invention recites non-functional descriptive material, *i.e.*, mere data. Non-functional descriptive material is merely carried on the medium, it is not structurally and functionally interrelated to the medium, and thereby does not manipulate, or execute, appropriate subject matter, and thus cannot constitute a statutory process (MPEP Section 2106(IV)(B)(2)(c)).

Claim Objections

3. Claims 2-8 and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

In re Application of: Rodriguez

Allowed Claims

4. Claims 9-17 are deemed allowable over the prior art of record at this time. Furthermore, claims 1-8 and 18-20 would be allowable over the prior art of record pending resolution of the rejections noted above.

Response Guidelines

5. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).
